Dear Mr. Higgs

This letter is in reference to the proposed changes in the health care systems at the six hospitals that have been named. These changes are in our opinion ludicrous, will cost lives and will have dire and long lasting consequences to the rural communities involved.

The proposed changes will devastate the rural areas along economic lines and not just medically. Communities are built around medical services and hospitals, not the reverse. With the way this was implemented your Health Minister and Health authorities have lost all respect and trust of our residents in the Local Service District, in the Parish of Sackville.

We feel that we must strongly support the requests from Sussex area municipalities and others for the removal of the Health Minister as well as both of the Health Authority CEOs and seek acceptable solutions to these problems and underlying issues that contributed to the present and unacceptable happenings, with the involvement of grass root stake holders in the areas affected to find proper resolutions.

Roger Gouchie
